OPEN TENDER FOR PROCUREMENT OF 53,900 DMT +/- 5% CAUSTIC SODA LYE FOR ALUMINA REFINERY AT M&R COMPLEX, DAMANJODI (ODISHA) AND CAPTIVE POWER PLANT(CPP) AT ANGUL (ODISHA)

For the bidders intending to supply by Ship on CFR Vizag Basis:

Bidders intending to supply caustic soda lye at Vizag on CFR Vizag basis, must calculate their Gross Destination price FOR Damanjodi Basis as per the price evaluation sheet given in Annexure-VIII.

It is to be mentioned that additional charges in respect of Wharfage, Haulage & transportation of caustic soda from Vizag port to Nalco Damanjodi have been considered for evaluation purpose only. The additional charge for wharfage, Haulage and transportation is ₹ 1,595 per DMT (Excluding GST).

In order to facilitate evaluation of bids for supply by Road/Rail mode and Ship mode together to determine the L-1 price and conduct Reverse auction in GeM portal, the GST on wharfage, Haulage and & transportation charges has been taken as 18% in the evaluation sheet (Annexure-VIII, Price evaluation sheet for supply of caustic soda by ship mode) for supply by ship mode.

Hence the bidders intending to supply caustic soda in ship mode for delivery at Vizag port, are required to calculate Gross FOR Destination price (as per Annexure-VIII, Price evaluation sheet for supply of caustic soda by ship mode) and submit the same in financial bid of GeM portal.

Explanation for calculation of Caustic soda Gross price (FOR Destination basis):

If a bidder intends to quote CFR price as ₹ 10,000 per DMT, then Gross FOR Destination price (Nalco Refinery, Damanjodi) works out to ₹ 13,682.10 per DMT. This calculated price is to be submitted in Financial bid/reverse auction in GeM portal.

However, after completion of RA (Reverse Auction), the PO shall be awarded to eligible bidders for supply by ship mode on **CFR Vizag basis** for their eligible quantity by conducting back calculation as per ANNEXURE-VIII.

NOTE: Please note that in case PO is required to be amended for change in mode of supply from Rail/ Road to Ship or vice versa, the PO price shall be amended by considering the actual additional wharfage, Haulage & transportation charges keeping the net landed price same. Insurance will be covered by NALCO.

Each and every supply shall be tested analysed at your laboratory before the material is despatched. The tanker number will be indicated in each report and you will send copy of chemical analysis directly to our Manager (Technical) along with challan etc.

ANALYSIS

The sample collected in bottle is to be shaken well immediately before analysis.

PROCEDURE

The sample is stirred & poured into a 250 ml cylinder and a calibrated hydrometer is dipped slowly and after stabilisation of the hydrometer, the density is noted along with the Temperature.

Calculation: $\text{NaOH} \%$ is calculated from standard chart as per IS 4016:1966.

Note: In case of deviation from norms, the confirmation test may be done as per IS 252:1991 including latest revision thereof, if any, (HCl titration method with methyl orange indicator).
