विषय/Sub: नालको की भौतिक प्रतिभूतियों के स्थानांतरण अनुरोधों को पुनः दर्ज करने के लिए विशेष विंडो पर रिपोर्ट। / Report on special window for re-lodgement of transfer requests of physical securities of NALCO.

आदरणीय महोदय/Dear Sir,

In compliance with SEBI Circular No. SEBI/HO/MIRSD/MIRSD-PoD/P/CIR/2025/97 dated 2nd July, 2025 w.r.t. special window for re-lodgement of transfer requests of physical securities, the Company has publicised the opening of special window through various social media including print and social media. In this regard, we hereby submit the following:

1. Publicity:

a) Newspaper Advertisements:

The same was published by the Company in “The Prameya” the Odia newspaper, “Financial Express” the English newspaper and “Navbharat” the Hindi newspaper on 21.07.2025. Copy of newspaper clippings are enclosed as Annexure.

b) Website Disclosures:

The same was also disseminated on the website of the Company i.e. https://nalcoindia.com/wp-content/uploads/2025/07/letter_relodgement-of-transfer.pdf

c) Social Media:

The above-mentioned information was also disseminated through the Company's official social media platforms. The relevant links are provided below:

Twitter:

https://x.com/NALCO_India/status/1960554182991040523?t=8SdT1Jx0Eh_UdhMLoMYvPQ&s=08

Oppn flags Pahalgam, Bihar SIR; govt says House must function

ASAD REHMAN
New Delhi, July 20

THE GOVERNMENT ON Sunday accepted a key Opposition demand for a discussion on Operation Sindoor during the Monsoon Session of Parliament, sources told. The Indian Express, even as INDIA bloc leaders insisted that Prime Minister Narendra Modi should respond on the Pahalgam attack, as well as on US President Donald Trump's claims of brokering the ceasefire between India and Pakistan in the House.

Indicating a stormy start to the Monsoon Session on Monday, the Opposition leaders raised the issues at a half-party meeting on Sunday. They also demanded a discussion on the ongoing Special Intelligence Revision (SIR) of electoral rolls in poll-bound Bihar. The government is yet to take a call on the matter, the sources said.

After the meeting, Parliamentary Affairs Minister Kiren Rijiju said the government had taken note of points raised by

Union ministers Kiren Rijiju and JP Nadda leave after attending the all-party meeting ahead of the Monsoon session of Parliament, in New Delhi on Sunday

the Opposition. "The NDA, UPA (INDIA bloc) and those in between have presented their opinions. We will take all these issues to Parliament, what is to be discussed and what not will be decided in the BAC (Business Advisory Committee)," he said.

"The government noted their (Opposition) points. We have requested that to ensure that the House functions properly, said Rijiju.

On April 22, as well as on Trump's claims. "This is a new hope than before that Prime Minister Modi will address the responsibility to ensure that the House functions properly," said Rijiju.

Congress Deputy Leader in Lok Sabha Gaurav Gogoi said the Prime Minister should speak on the Pahalgam terror attack, in which 36 people were killed at the popular tourist destination

on April 22, as well as on Trump's claims. "This is a new hope than before that Prime Minister Modi will address the responsibility to ensure that the House functions properly," said Rijiju.

question on the dignity of India, the bravery of the Indian Army. The answer to the US President can be given only by the Prime Minister," he said.

Referring to the Bihar SIR exercise, Gogoi said, "Secondly, important questions are being raised today regarding the right to vote." He said that the third issue to be addressed is about the two-front axis that has been formed on the border with China, Pakistan and Bangladesh. "So, it is very important that we talk about defence and foreign policy. It will be very important for the Prime Minister Modi to come to this House and put forth his views on these three subjects," he said.

On Monday, Opposition parties are expected to move adjournment motions in both Houses seeking a discussion on Pahalgam attack and related issues. In its tentative list of key business for the month-long session, the government has included the new Bills seeking to update the pending Income Tax Bill through

Govt taps global firms for satellite imagery

AANCHAL MAGAZINE
& ANIL SASHI
New Delhi, July 20

WITH HIGH-RESOLUTION satellite imagery proving to be indispensable in evolving battle situations, the government is learnt to have reached out to multiple global commercial earth-observation satellite players for sourcing it.

The initiation of talks with these satellite imagery providers comes in the wake of Operation Sindoor in May, where it has been inferred that China provided live inputs through satellite support to Pakistan. Senior Army officials have since said that when the DCMO-level talks were on, Pakistan flagged information about "specific vectors" on the Indian side that were being primed and readied for action, likely from satellite inputs facilities by China.

"We are in talks with commercial satellite imagery providers. We have to deepen our surveillance measures," an official said.

The objective of these discussions is to extend these

■ The initiation of talks with these satellite imagery providers comes in the wake of Operation Sindoor

■ It has been inferred that China provided live inputs through satellite support to Pakistan

■ The objective of discussions is to extend surveillance envelope and to do real-time surveillance

veillance envelope and be able to do real-time surveillance at the time of conflicts to form efficient military actions, officials said.

The move likely includes Maxar Technologies, which operates some of the world's most advanced Earth observation satellites that can capture images with 30-centimetre

resolution, detailed enough to discern targets such as infrastructure, buildings, artillery gun systems and even vehicles.

When contacted, Maxar's spokesmen said they "don't comment on contract negotiations".

While India's satellites, including the Cartosat-3 and RISAT, have played a big role in helping defence forces to strategise, track enemy mobilisation and confirm the situation, while maintaining real-time situational awareness which prevented any major damage to the country's military assets, these domestic satellites face some limitations in their capabilities.

The Cartosat-3 satellite was designed to offer resolution of up to 30-centimetre, but is claimed to provide good quality imagery at about 50 centimetres. Also, Cartosat-3 operates in a sun-synchronous orbit, which means it can scan the same area, something that is crucial during fast-paced military engagements where the battlefield is limited to specific sectors. Visibility is crucial, which the Pakistanis are believed to have with Chinese inputs.

FROM THE FRONT PAGE

FPO scheme takes big strides

OVER 9,000 FPOs are currently on the ONDC platform. More than 200 collectives are reselling products on platforms such as GeM, while sales of agri produce have also commenced in a significant way via Amazon and Flipkart.

Gujarat-based Babra Khedut Upadkha & Rupnarayan Sahakar Mandli, an FPO with 1,465 members, has reported sales turnover of ₹102 crore thanks to procurement of groundnut and cotton at MSP from its members on behalf of government agencies.

"We will be expanding our agri inputs business in the current fiscal to further boost the turnover," Nirav Prakashbhai Mathukia, CEO of the group, told FE.

At present, more active FPOs collectively sell thousands of unique agricultural and allied sector products, including 200 varieties of rice, pulses, millets, honey, mushrooms, spices, and value-added products.

To boost business prospects, they are being granted input licences and dealerships in seed, pesticide and fertilisers. Leading buyers of commodities including oil and inter-

national, Big Basket, Britannia, Flipkart, Country Delight and NCCF have held direct discussions with FPOs under the government initiative.

A senior official said financial assistance and marketing support to these collectives, where over 3 million farmers have equities, would continue till FY26.

The scheme is aimed at enhancing collective bargaining power of farmers through local aggregation, reducing cost of production through leveraging economies of scale and financial assistance of up to ₹18 lakh per FPO for three years.

In addition, a provision has been made for matching equity grants of up to ₹2.00 per farmer member of an FPO with a limit of ₹15 lakh per collective.

There is a credit guarantee facility of up to ₹2 crore from eligible lending institutions for these collectives, while ₹25 lakh per FPO is being provided to cluster-based business organisations to boost marketing.

The scheme has a budgetary provision of ₹6,865 crore for five years (FY21-FY26).

Army plans rollout of AI by 2026-27

AMRITA NAYAK DUTTA
New Delhi, July 20

FROM COORDINATED DRONE missions for drone swarming) and real-time battlefield monitoring to combat simulations for troop training, information warfare, and data-backed decision-making — the Indian Army is learnt to have drawn up a detailed roadmap identifying key areas where it plans to deploy Artificial Intelligence (AI), Machine Learning (ML) and Big Data Analytics by 2026-27.

According to sources, one of the immediate priorities is to improve battlefield awareness using AI tools that can process large volumes of information quickly. These include text summarisers built on Large Language Models (LLMs) to scan and condense long reports, AI-powered

AI will be used to analyse feeds from drones, satellites, aircraft and ground sensors, and fuse this data in real time to support faster, more informed decision-making.

Other chatbots, voice-to-text systems, facial recognition, and tools that can detect unusual patterns or threats. AI will also be used to analyse feeds from drones, satellites, aircraft and ground sensors, and fuse this data in real time

to support faster, more informed decision-making.

Although the use of AI has been discussed by the Army in the past, it is now being fast-tracked in the wake of lessons learnt from Operation Sindoor — the Army's cross-border operation in May targeting terror infrastructure in Pakistan and Pakistan-occupied Kashmir.

As part of this push, an AI task force under the Director General of Information Systems (DGIS), with representatives from other Army directorates, will soon be set up to oversee the implementation of niche technologies across the force. This will include areas such as training and capacity building, data sharing, maintenance and support, integration, promoting research and development, and incorporating these

technologies into procurement processes.

Sources said the roadmap — which sets specific tactical, operational and strategic goals to be met by 2026-27 — includes deploying AI across a wide range of functions, including decision support systems that can generate intelligence, enhance surveillance, manage logistics and supply chains, analyse Open Source Intelligence (OSINT) and social media, map adversary capabilities and run wargaming simulations.

These technologies will also be used for better positioning and targeting of equipment, predictive maintenance, and AI-based navigation in environments where GPS access is denied. Decision support systems will further assist in operational planning and threat detection.

Tata Motors CV revival

AT THE COMPANY'S recent annual general meeting, Tata Sons and Tata Motors chairman N Chandrababu Naidu acknowledged the issue directly.

"An area where we need to deliver is the SCV segment which is severely under-performing. We need to improve our performance and market share and we are focused on addressing it this year," he told shareholders.

The problem, however, is not limited to Tata Motors alone. The SCV segment itself has contracted sharply over the years. Once accounting for 23% of the total CV market in FY19, SCVs made up just 16% by FY25. Industry insiders point to several reasons for the slump, chief among them being the rise of electric three-wheelers, tighter financing norms, a tepid increase in freight rates, and the rising cost of SCVs.

Pinaki Halder, vice president and business head, SCV & PU (pickups), Tata Motors Commercial Vehicles, explained that the Covid-19 pandemic worsened the situation. "It particularly impacted first-time buyers who were already grappling with higher acquisition costs and income uncertainty. This led to a spike in NPAs, more cautious lending practices, and declining resale values, making financing a critical concern for the

segment," he said.

Changing customer preferences have also influenced the downturn. While some buyers moved up to larger pickups for better payload efficiency, others switched to electric three-wheelers that benefited from government incentives and more relaxed regulatory norms.

Tata Motors, however, is actively repositioning itself in the three-wheelers and light commercial vehicle (LCV) space. Its newly launched model, the Ace Pro, targets the under-served niche between three-wheelers and traditional SCVs. With a 750 kg payload capacity, the Ace Pro is available in electric, CNG, and petrol variants, with a starting price of ₹3.99 lakh.

"The Ace Pro will address a whitespace in the industry leading in both payload and range (EV). For diesel, we intend to make some significant product interventions starting with one in Q4 of this year followed by another in Q4," Halder said during Tata Motors Investor Day.

As part of a broader strategy, Tata Motors is also merging its commercial vehicle business into focused verticals. Among the eight new sub-divisions, the SCV & PU vertical is seen as a key pillar of growth. With these efforts, Tata Motors aims to regain a 40% share in the domestic CV market in the near term.
